DIGI TUBE - set of 18 micro-learning units

The aim of this project result is to provide VET teachers with **micro-learning units** in form of **short catchy videos** with instructions on how to include **and use innovative digital tools** in practical classes of vocational education. A **set of 18 micro-learning units** is created as supplementary digital material for teachers and trainers in a form of short and educational videos to simplify the implementation of chosen tools in class or in distance learning.

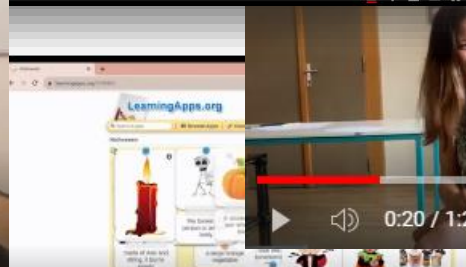

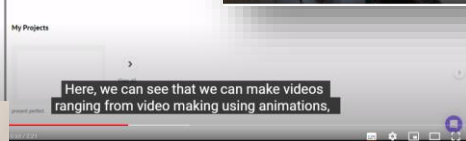

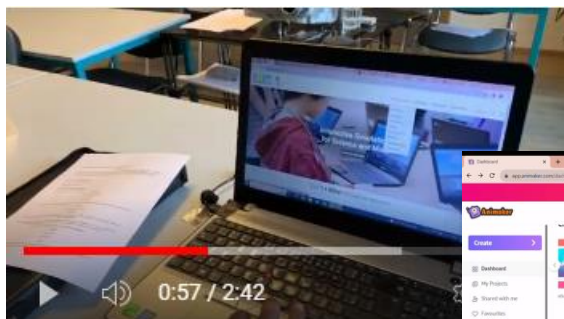

THE GOAL OF EACH VIDEO IS:

- Motivate VET teachers to start using the digital tool in their practical VET lessons - Provide brief information about the specific digital tool.
- To educate teachers on how to deal with problematic situations that teachers usually encounter (using a specific digital tool).

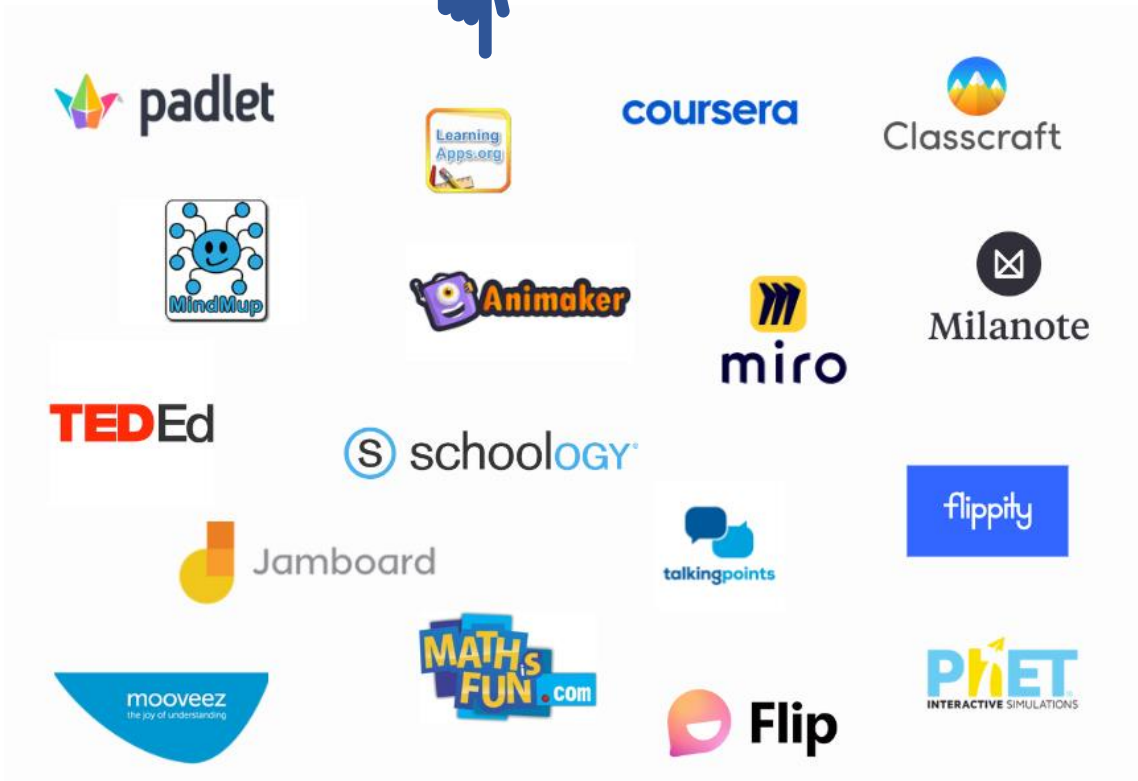

All videos are **dubbed in English** with subtitles translated languages - Czech Italian, German and Spanish.

DIGI TUBE - set of 18 micro-learning units

The fundamental content of the video comes from **problematic situations** that teachers struggle with and **how digital tools can help them with that**.

In conjunction with these digital tools

The topics that are most relevant to educators today have been selected:

- Effective communication with students
- Communication with other stakeholders
- The importance of ongoing feedbacks: an important tool for growth mindset
- The digital tools for formative assessment
- Gamification: how to evaluate and involve students
- Teamwork unlimited
- Creative learning
- Integration of students with dyslexia, dyscalculia and other disabilities
- Integration of students with different languages
- The importance of the assertive communication
- How to support student in managing stress through game-based learning

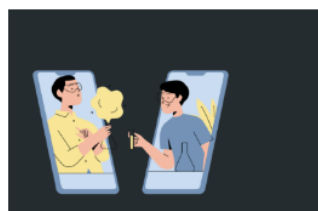

and many others

Check out our [YouTube channel](#) to see all the videos and learn how to strengthen your digital competences in education. Be part of it and let's discover new ways of digital learning together!

Where we are now...

DIGIHUB

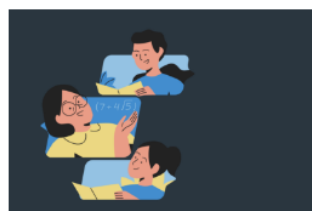

DIGI HUB with project results where you can learn about digital tools for your teaching. You will find here best practices from all our partner countries in our **DIGI CASES**, summary information about digital tools in **DIGI TOOLBOX** and educational micro-learning videos under the **DIGI TUBES** section. You have also an opportunity to test your knowledge in the **Self-assessment quiz**, which practices your digital competence on the basis of all three modules. The self-assessment has a total of 20 questions and there is only one correct answer per question.
